

1200W Portable Power Station Emergency Power Source

User Manual

Model: SGR-PPS1200-3

Preface

Thank you for purchasing this 1200W portable power station. This portable power station has a powerful battery capacity of 1008Wh, supporting AC wall outlets, solar panels and vehicle charging ways, and is designed to keep your electronic devices powered while on the go.

It comes with AC outlets, 12V DC output ports, 12V car port, Type-C port and fast charging USB ports 3.0 for your convenience. Perfectly for outdoor travel, it is compatible with most electronic devices such as drones, laptops, lights, smart phones, tablets and cameras.

You can charge your electrical or digital devices with this unit in case of a power failure or when you are out or on a road trip.

It also works as an emergency power kit. Especially, it's suitable for locations that are prone to severe weather patterns and natural disaster related power failures including typhoons, floods, hurricanes, earthquakes, forest fires, snowstorms and low-temperature disaster-prone areas.

The power station is also suitable for camping and works well in keeping outdoor electrical appliances charged for uses such as night time power supply, medical power supply and general household electricity storage.

Package Contents

1*AC Power Cord

1*Car Cigarette Cable

1*MC4 Cable

1*User Manual

Warm Tips:

Before using our power station, please read the following instructions carefully:

1. This power station has a built in lithium battery which is highly sensitive to high temperature - Keep it away from heat sources like direct fire or any heat sources.
2. Keep away from moisture or water.
3. Do not disassemble microwave, puncture, incinerate or insert foreign objects into the power station.
4. Do not crush, bend, shred, drop or place heavy objects on top of the device.
5. Do not use the product if damaged or punctured.
6. Always be prepared - Charge the unit every three months also if it is not used.

Technical Specification

Battery Capacity	LiFePO4 1008Wh±5%(45Ah/22.4V)
AC Input Charging	AC100~120V 700W Max
Car Input Charging	DC12V~24V/10A Max
Solar Input Charging	DC12V~60V/10A 400W Max
Output Port	AC output*4: 110V±10%, 60Hz±5, 1200W, Peak 2400W
	USB-A1: 2*5V2.4A AUTO USB-A2: 2*QC18W Max, (5V3A&9V2A&12V1.5A QC3.0) USB-C: 2*PD60W Max, (5V3A&9V3A&12V3A&15V3A&20V3A PD3.0)
	1*Cigarette Lighter, 2*DC5521 Rated Output 13.8V/10A (Total 10A Max)
AC Output Waveform	Pure Sine Wave
LED Light	2W Max, 3 Levels(L/M/H adjustable), SOS function
Safety Protection	Short-Circuit Over-Current Over-Voltage Low-Voltage Over-Load Over-Temperature
Operation Temperature	0~40°C(32~104°F)
Battery Cycle Life	2500 times, SOH≥70%
Pass-Through Charging	Support
Weight	13kg/28.6lbs

Using Your 1200W Power Station

1. Press the power button or any other port button to turn on the unit. When not using certain ports, it is best to turn them off to conserve power.
2. Read the LCD screen to know which port is turned on.
3. Plug in your gear.
4. Your unit supports full pass-through charging so you can charge your power station and run your gear at the same time.

Product Diagram

*The circuit protector is an electrical safety switch designed to protect your unit from damage caused by over-current or short circuit. When the AC output exceeds 15A or 1500W, it will trip automatically. Press it once to reset the unit after these symptoms cleared.

LCD Display

① 	Solar Panel Input Indicator	⑧ UPS	UPS Function Indicator
② 	Input Power	⑨ AC	AC Output Indicator
③ 	Charging Mode Indicator(Q,N,S)	⑩ 	Output Power
④ DC	DC Output Indicator	⑪ TEMP	Temperature Warning
⑤ USB	USB Output Indicator	⑫ 	Output Power Indicator
⑥ LED	LED Indicator	⑬ 	Remaining Battery Percentage
⑦ 	Remaining Usage Time or Remaining Charging Time(Hour)	⑭ 	Input Power Indicator

*The remaining usage time depends on the real-time output wattages of the loaded devices.

The remaining hours tells the remaining charge/discharge time. It will prioritize displaying the remaining discharge time when charging and discharging simultaneously.

(The remaining time may has errors and the data is for reference only.)

Auto-Sleep Mode:

To avoid forgetting to turn off the output during use that results in battery consumption, the unit will turn to Auto-Sleep Mode when no device is connected or the connected device is less than or equal to a certain value. When without charging, and the AC&DC&USB outputs \leq 2W, the device will automatically shut down after 1 hour.

Ways to Recharge

1.AC Wall Charging

Please plug the unit into the standard wall outlet and start charging.

This power station supports Quick/Normal/Silent charging modes. The default charging mode of the unit is "N"charging mode. Press the AC Charging button to switch these 3 charging modes.

2.DC Vehicle Charging

Please connect the unit directly to the vehicle plug-in cigarette lighter port via the car charging cable.

Cigarette lighter **MUST** be fully inserted into the lighter port of the machine.

3.Solar Charging

Note: Please make sure your solar panels comply with Open Circuit Voltage of DC12-60V.
The Max Solar Input Power of the power station is 400W.
We recommend a 200W-400W solar panel with the voltage of DC12V-60V.

 Never use higher than DC 60V to recharge this power station.
ONLY use solar panels with compatible voltage.

UPS

UPS Bypass Mode: Connect the power station with the AC power, then turn on the AC output, and the 'UPS'"AC"' will be on display. When on this mode, the AC power will directly support the loads on AC output ports and charge the unit. The UPS Bypass Mode prioritizes providing AC output power, then the excess power will supply for charging the power station.

Note: Max. output power: 1200W.

The AC inverter is disabled under UPS Bypass Mode. The unit won't enter this mode unless connecting with AC power AND turning on the AC output.

Usage

Emergency:

The power station can be used as an emergency power supply during power failures. It is especially suitable for locations that are prone to severe weather patterns and natural disasters including floods, hurricanes, earthquakes, forest fires, and snowstorms.

Outdoor Activities:

Camping, outdoor celebrations, fishing, climbing, outdoor photography, RC helicopter and drone charging, farming and bird watching.

Home Backup:

Home and office electrical device charging, energy-saving lamps, television, mini refrigerators, holiday decoration lights, printers, laptops, fans and smart mobile phones.

Usage time of devices

 Projector (150W) 6 Hrs	 *Mini Cooler (50W) 18 Hrs+	 Blender (300W) 3 Hrs	 Coffee Maker (800W) 1 Hrs	 Washer (500W) 1.8 Hrs
 Hand Drill (600W) 1.5 Hrs	 *Refrigerator (100W) 9 Hrs+	 TV (90W) 10 Hrs	 Microwave (90W) 1 Hrs	 CPAP (40W) 22.6 Hrs

NOTES:

- 1.Run time=1008Wh*90%(conversion rate)/Your device's power(Watts).
- 2.Support all electronic devices less than 1200 Watts.
- 3.It is recommended to use a DC port instead of an AC outlet to power your CPAP machine.
- 4.*The usage time for refrigeration machines with compressors mainly depends on temperature setting and start frequency of compressors, it's usually lasting longer time than certain reference time.
- 5.The above charging times are calculated as a reference guide only. The actual usage time will depend on the power of the connected devices.

FAQS and Solutions

1. How long will the SGR-PPS1200-3 run my device?

Running time= $1008 \times 90\%$ (conversion rate)/Device Rated Power. Eg.

If you run a 800W microwave oven, the running time is: $1008\text{Wh} \times 90\% / 800\text{W} \approx 1.1\text{hrs}$.

The actual working time may vary based on various circumstances.

2. Is lithium-ion battery the same as LiFePO4? Which battery is better for a solar generator or power station?

No, there are a few differences in performance, chemical composition, and longevity between lithium-ion and LiFePO4 batteries. Both are safe and reliable choice for solar generator and power station. They have a longer lifespan and can charge most homes efficiently. But LiFePO4 batteries have a longer lifespan, enhanced safety and increased thermal stability.

3. What is the life expectancy?

It is rated for 2500 full charge cycles. After that, you will have about 70% of your original capacity, charge-discharge cycles SOH \geq 70%. TIP: Please leave \geq 30% battery quantity on LCD and then charge the power station soon which can use longer.

4. Can I charge it with solar panels from other manufacturers?

Yes. Open circuit voltage: 12-60V/10A, Total solar input: 400W Max, our power generator is built in M20 input port. We recommend ALLWEI 200W Solar Panel.

5. Why does the power station has Autp-Sleep Mode?

To avoid battery consumption due to not turning off the output after used, the unit will switch to the Auto-Sleep Mode. Whe the unit detects that no device is connected or the connected devices are \leq 2W, it will automatically shut off after 1 hour.

Set up time to 1 hour or 12 hours by long pressing "USB" button for 5 seconds. Please check the time on the LCD screen within 5 seconds after hearing the buzzer sounds. It shows the set standby time.

6. How to reset the power station when over-load protection?

If your device watts is beyond the 1200W, it will trigger over-load protection. Please press the "Circuit Protector" Button on the back of the battery to reset the power station.

7. Is the battery has UPS Function?

Yes. The 1200W Power Station has Uninterruptible Power Supply (UPS) function. When wall outlet is interrupted, UPS will supply 110V AC power to the load in less than 10ms, which is faster, safer and more intelligent than ordinary power stations.

Common Trouble Shooting

Failure Description	Types	Solutions
Unit can not charging from AC wall outlets	AC charging fault	1.Please ensure to use original AC Power Cord. 2.Please check if the AC wall plug is correct connection. If not solved,Please contact our after-sales service.
Unit can not charging from solar panel	DC solar charging fault	1.Please ensure solar charging connection is correct under user manual. 2.Please ensure connected solar panel specification is meet specified standard. 3.Please ensure solar panel charging under sunlight environment. 4.If not solved,Please contact our after-sales service.
LCD Screen icon flash "AC" "DC" "USB"	Over-current protection Short circuit protection Over-voltage protection Low-voltage protection Over-Load protection	Resolve the problem by pulling out plug or remove electrical devices,the product can recover itself after re-start. If not solved,Please contact our after-sales service.
High-temperature icon continuous appears	High-temperature warning	Power station can recover itself after battery cooled.

Maintenance and Storage

- 1.When not using the unit for extended periods of time, power off the unit and disconnect the AC adapter from the outlet.
- 2.Charge the unit to 80% capacity every 3-6 months for long-term storage.
- 3.When the battery capacity drops to 20%, recharge the power station in time to extend the battery life.
- 4.Clean the unit with a dry cloth gently and carefully.
- 5.DO NOT stack anything on top of the unit either in storage or in use.
- 6.Store it in a dry and cool place with temperature range between -20℃~60℃ , and humidity 20%~85%RH.
- 7.Avoid contact with corrosive substances fire and heat sources.

Warranty & Customer Service Support

Thanks for purchasing our 1200W portable emergency power station. The portable power station is covered a warranty of 5 years from the date of its original purchasing. The warranty covers material and manufacturing defects prior to being shipped to third parties. This warranty does not apply: Any defects or damages caused by misuse of products, unauthorized modification, dis-assembly or operation not in accordance with the official instructions or manuals.

If you have any after-sales questions or need further technical assistance, please feel free to contact the email: ✉ allweiservice@outlook.com

CAUTION

- a) Do not overcharge the internal battery. See instruction manual.
- b) Do not smoke, strike a match or cause a spark in the vicinity of the POWER STATION.
- c) Only charge the internal battery in a well ventilated area.
- d) Risk of Electric Shock. Connect only to properly grounded outlets.
- e) Risk of Injury to Persons. Do not use this product if the power cord or the battery cables are damaged in any way.
- f) Keep away from moisture or water. Do not use outdoors on rainy days.
